Tyler, Texas

Web Developer: I build websites and browser apps with HTML, CSS, and JavaScript. My work covers layout, interface, and the features people use. Available for contract and full-time remote or hybrid positions.

Skills:

HTML, CSS, JavaScript, TypeScript, Responsive Layout, Git, PixiJS, Three.js, Supabase, Firebase, Vercel, PWA, C++.

Applications:

Visual Studio Code, GitHub, Chrome, Vercel, Firebase, Supabase, Adobe Photoshop, Adobe Illustrator.

Education:

Full Sail University, Creative Writing Concentration, BFA, expected graduation date 2028.

Creative Writing Certificate.

Tyler Junior College, Game Simulations And Development, AAS.

Experience:

StarStudio - Personal project - Built a writing site in the browser: an editor, a library, a reader, and a lore atlas. The pages are HTML, CSS, and JavaScript. Accounts and saved work use Supabase, and the site is hosted on Vercel.

Space Meadow - Personal project - Built an interactive scene in the browser with TypeScript and PixiJS: a day and night sky, weather, and a world drawn on a canvas, with an HTML interface on top.

Programming Fundamentals I-III - 10 credits - March 2025 - Programming techniques, data structures, and algorithms.

Game and Simulation Programming I-II - 3 credits - March 2025 - Software development, user interface design, and how programs handle images and files.

Game and Simulation Group Project - 3 credits - March 2025 - Team project covering design, programming, and quality assurance.
